Ride Lubricant per eni

The line of lubricants developed for your motorcycle
a new energy in your engine

eni.com/na

innovation, the highest levels of
technology, excellent **quality**:
this is what **i-Ride** means for **eni**

the six-legged dog, an important link between the present and the future

in 2009 **eni** launched a process for the rationalisation of all of its brands in order to ensure clear identification and greater efficiency for its main brand. The evolution and harmonisation of **eni**'s image affects more than 70 countries and the numerous sectors in which **eni** operates. The visual identity that the company has achieved is aimed at expressing the company's new role as an all-round integrated energy company, providing fuels, gas and electricity. **eni** today is an open and dynamic company. Its key values are sustainability, culture, partnership, innovation and efficiency. And in line with these principles, **eni** has developed a logo that maintains elements of continuity that have characterised the company since its foundation and highlights the spirit of an integrated company in continuous evolution, attentive to the needs of the territory and all of its stakeholders. Today sees the launch of a new line of motorcycle lubricants with the **eni** brand **i-Ride**, the result of the experience and tradition of Agip, based on **eni**'s research strengths and cutting-edge technology.

From eni research comes a line of high performance motorcycle and scooter lubricants that offer improved power, performance and reliability for all types of engine.

The commitment and competence of our researchers have enabled us to achieve **the high standards of** technological **excellence** and to formulate increasingly innovative products able to meet the needs of all our customers. **eni i-Ride** is consequently a complete range of special products with the best technology to guarantee maximum reliability, ideal even for the most demanding motorcyclists.

All of our products are subjected to the most severe tests to ensure that they conform to the highest quality and performance standards (API, ACEA, JASO).

**and the packaging is also new,
and now includes a practical spout**

the new system is:
functional for topping up;
ecologically sustainable, in that it avoids waste and oil spillages;
practical because it is part of the packaging.

a commitment to racing

The presence of the **eni** brand in the MotoGP World Championship as a supplier of fuels and lubricants in the Moto2 category is a symbol of the active technical collaboration and exchange of information that has allowed us to experiment and test new products for use also on production models. In order to achieve these results **eni** has made its vast experience available to the world of motorcycle racing, along with its specialised technicians and research facilities. Today **eni** is present on a range of competitive circuits around the world, a demonstration of the continuous development, in line with the most up to date engine technologies, of cutting-edge product formulations dedicated to high performance.

motorcycles

4T i-Ride Moto2 5W-40

A lubricant specially developed and tested for Moto2 and regularly used on competition circuits; formulated on synthetic bases to meet the requirements of high-performance 4T motorcycle engines. The particular level of viscosity boosts the power of the engine in all conditions and facilitates also low temperature starts. The special package of additives developed in our laboratories ensures excellent detergent properties which avoids the effects of engine wear and corrosion.

4T i-Ride MotoGP 10W-60

A totally synthetic lubricant formulated with the best available components, bases and additives, to meet the needs of high specific powered 4T motorcycles. The special synthetic bases used guarantee excellent resistance to high temperatures and excellent product stability, thanks to the fundamental action of additives entirely developed by **eni**. Its characteristics make it particularly suitable for use in sports and competitions.

s p o r t

for **protagonists on two wheels**

products that derive from
our experience in motorcycle
racing and close collaboration
with the champions of the
sector

4T i-Ride moto 20W-50

A top synthetic lubricant that guarantees maximum engine protection, also in severe riding conditions. Its characteristics of resistance to extreme conditions and optimal viscosity are also felt after prolonged use. Indeed, the high level of viscosity encourages exceptional resistance to the shear stress to which the product is subjected, low volatility and a high level of thermo-oxidative stability.

street &

for those who **ride feelings**

products that can guarantee optimum reliability and improved engine protection, also after high mileage; suitable for both long motorway journeys and intermittent urban use.

motorcycles

t o u r i n g

4T i-Ride moto 10W-30

A synthetic lubricant for 4T touring and road motorcycles, on motorways and in town. It guarantees a high level of wear protection and prolongs the life of moving parts. The package of additives provides excellent detergent properties, offering protection and cleanliness for the engine in all conditions.

4T i-Ride moto 10W-40

A high-performance synthetic lubricant for 4T engines. Thanks to an exclusive formulation it is suitable and recommended for long-distance tourism. Its high detergent and dispersant qualities keep the whole of the engine clean, protecting the engine from wear and the build-up of deposits while remaining stable also after high mileage.

street & touring off road

motorcycles

2T i-Ride moto 2T

High performing synthetic lubricant in the 2T sector, for both on and off road use. It offers excellent results in all types of use: road, trial and off road. Suitable for both self-mixing and the manual preparation of blends, it offers excellent performance while guaranteeing low exhaust levels.

off road

for those who are always
looking for **new roads**

very high performance
with high resistance
for extreme conditions

4T i-Ride moto 10W-50

A lubricant with top synthetic technology, suitable for the most severe conditions and loads for long periods. Developed for 4T off-road motorcycles, it offers wear protection to all of the internal parts of the engine. It's special formulation guarantees the minimum loss of power and longer gaps between services. It also guarantees maximum acceleration and minimum oil consumption.

for those who **live intensely**
on two wheels

products for motor scooters, conceived for
demanding urban use, but also suitable for
use outside the town

scooter

4T i-Ride scooter 10W-40

A lubricant designed for intense urban use, as well as for extended out of town trips. It is suitable for 4T scooter engines, of both small and large size and specific power and air and liquid cooled engines. It also offers the maximum gap between oil changes foreseen by the manufacturers with a wide safety range.

scooter

4T i-Ride scooter 15W-50

A lubricant with a synthetic base for scooters subject to intense and prolonged urban use. It guarantees protection and longer life for the engine, with reduced oil consumption.

2T i-Ride scooter 2T top

A top synthetic lubricant for the latest generation of 2T engines. Offering maximum anti-jamming safety, also in extreme conditions, high levels of engine and exhaust system cleanliness. Minimal exhaust fumes.

2T i-Ride scooter 2T

A lubricant for 2T scooter engines, ideal lubrication for ready-made blends and the manual preparation of blends. Guaranteeing low exhausts and minimising the build-up of deposits both inside the engine and in the exhaust system.

Piaggio

2T i-Ride 2T

A top synthetic lubricant, recommended for the latest generation of 2T engines, both for motorcycles and scooters. Maximum anti-jamming safety, also in extreme conditions, high levels of engine and exhaust system cleanliness. Minimal exhaust fumes.

4T i-Ride 10W-60

A top synthetic lubricant, recommended for the latest generation of high performance bikes. Created directly from experience in the world of racing, it is particularly recommended for competitions and sporty use.

4T i-Ride 5W-40

A high performance top synthetic lubricant recommended for the latest generation of motorcycle and scooter engines. Easy cold-starts, excellent viscosity also after prolonged use.

eni i-Ride for Piaggio

for those who want to get
the **most enjoyment** from their motorcycle

a collaboration that has led to the creation of a special range of lubricants for
Piaggio motorcycles and scooters and the specific products of Aprilia Racing

4T i-Ride 10W-40

Synthetic-based lubricant recommended
for motorcycle and scooter engines subject
to extended and intensive use. Excellent
cleanliness and protection of engines.
Ideal for Stop&Go.

Aprilia

for those who are **second to none**

a line of lubricants created from experience in the racing sector and close collaboration with world Superbike champions; the victories of Aprilia confirm that performance of absolute levels of excellence were obtained also thanks to the use of eni products

Piaggio

Racing

4T i-Ride Aprilia Racing 10W-60 e 5W-40

A top synthetic lubricant with excellent performance level, designed also for racing use, meets the requirements of high performance 4T motorcycle engines. The special additive package ensures optimum detergent qualities, effectively guaranteeing wear protection and preventing engine corrosion.
